LEARNING LICENCE KIOSK

Purpose:

As per the existing system to get LLR, the applicants have to appear for the computerized tests where one must give 12 right answers (60 per cent) out of 20 objective questions based on road sense and signs. From a pool of 500 questions, the computer randomly chooses 20 questions which appear in three languages - English, Hindi

Features:

- It includes 250 questions in three languages (i.e. Marathi, Hindi and English)
- It provides various modules i.e. Applicant Management, Batch Management, Report Management and User Management
- At one time 50 applicants can seat/appear for LLR test.

It will show applicants LLR test result as soon as test is completed

GATE PASS KIOSK

Purpose:

Automated processing of check-in procedures has been the foundation of countless kiosk deployments, and a cornerstone of industry growth.

- KIOSK has developed customized transportation industry check-in solutions for airline, border control, and transportation clients including SITA, Mexicana Airlines, The Department of Homeland Security, Carnival Cruise Lines, HLX, and Vanguard (Alamo & National Car Rental).
- Similarly, secure check-in solutions have been deployed by many KIOSK clients for medical patient processing within the healthcare industry. Consumer adoption of self-service technology for check-in applications is well-proven, positioning deployers for a strong long-term ROI.
- The common elements of all these check in solutions are added customer convenience, improved speed of service, reduced overhead for the deployers, and added security to the check-in process.

Features:

The common objectives of check in solutions are added customer convenience, improved speed of service, reduced overhead for the deplorers, and added security to the check-in process or transaction. The right mix of self-service feature components to achieve these metrics varies, but commonly integrated key elements include:

- Bar code scanners, Passport /driver's license / document readers, to streamline data collection accuracy and methodology.
- Credit card readers to transact fees / rental agreements, and verify reservation data.
- Printers capable of printing boarding passes, rental contracts, bagg

HRKIOSK

Purpose:

Many of Kiosk's most successful and longest-running self-service deployments are in Human Resources.

- In manufacturing, retail, healthcare, government, and many other corporate environments, the percentage of employees without daily access to a computer can easily represent 30 – 40%. KIOSK customers such as USPS, Pepsi, Avery Dennison, CITI, and Disney have deployed kiosk technology to connect their entire work force and realize even greater proceeds from their pre-existing self-service applications.
- Cost saving HR applications like automated benefits enrollment, pay record access, profile management, and job training can be layered to improve the services extended to disconnected employees and accelerate ROI.
- Further, large retailers like Walmart, Safeway, and others have achieved exceptional ROI with an in-store job application kiosk, realizing cost savings from automated processing of literally millions of applications annually.
- These early adopter clients have paved the way for integration of all the major HR platforms, removing historical time and cost barriers. Further, with integration of HR-specific privacy peripherals, virtually all HR applications can be run on standard KIOSK enclosures.
- Turnkey applications, standardized hardware, and the maturation of self-service with connected employees have all combined make HR kiosk deployments simpler and more cost effective than ever before.

Features:

Feature, benefits, and ROI potential of common retail applications. Features and Benefits:

- HR kiosks offer self-service functions to employees without access to desktop computers, or those not located near an HR office
- 24x7 access to HR information without the need for human intervention reduces costs and increases convenience for employees

- Online forms and pay-stub printing on-demand saves paper, distribution and administration costs
- Factory floor HR kiosks act as a virtual assistant for employee training, scheduling and other managerial functions
- Hiring kiosks allow for pre-screening and processing of applicant data, accelerating the hiring process and reducing administrative delays
- HR Self-Service applications can be layered onto retail kiosks for after-hours use, leveraging your existing investment
- Gaining access to the disconnected employee through a kiosk increases employee morale
- Optional touch screen interface simplifies access to information for less computer-savvy employees

ROI Opportunities:

- Reduction in overall benefits transaction costs
- Decrease HR overhead / staffing costs
- Reduction in printing and distribution costs
- Reduction in training and “on-boarding” costs
- Reduction in new employee turnover
- Better data integrity reducing information audits

- Accurate results
- Uninterrupted performance

Other details:

- Can be used with RFID or Thumb reader facility
- Can be attached to Centralized Database of employee
- Facility for connectivity with Payroll software
- Facility of printing coupon or coin dispenser

TAX PAYMENT KIOSK

Purpose:

For people who don't have bank accounts or credit cards, cash is king. But when it comes to paying property taxes in Wayne County, using cash is difficult and costly.

AUTOMATIC CAR PARKING KIOSK

Purpose:

An automated car parking kiosk is a mechanical system designed to minimize the area and/or volume required for parking cars. Like a multi-story parking garage, an automated car parking kiosk provides parking for cars on multiple levels stacked vertically to maximize the number of parking spaces while minimizing land usage. The automated car parking kiosk, however, utilizes a mechanical system to transport cars to and from parking spaces (rather than the driver) in order to eliminate much of the space wasted in a multi-story parking garage. While a multi-story parking garage is similar to multiple parking lots stacked vertically, an automated car parking kiosk is more similar to an automated storage and retrieval system for cars.

Features:

- High performance
- High detection accuracy (up to 99%)
- Easy installation
- Long operational life
- Best performance

GAMING KIOSK

Purpose:

- Kiosks, Inc. provides a long list of gaming solutions for its clients ranging from conventional redemption and self-service sports booking to event ticketing, loyalty card kiosks, cash-in & cash-out transactions and digital signage.
- The gaming kiosks have been used extensively by casinos for various loyalty applications, automated access to clients on their point's information, incentives and promotions to attract repeat customers, enhancing revenue and growth for the deplorer.

Features:

The team of experts at Kiosks, Inc. can work in close collaboration with you to understand your software application needs, preferences and objectives. Our program managers and channel managers having expertise in different vertical markets will then chalk out a detailed application development plan to address your requirements. Our product development experts will deliver to you a 100% customized solution to help you achieve your objective.

HEALTHCARE KIOSK

Purpose:

- The Patient Check-In Kiosk adds patient convenience, allowing them to identify themselves upon arrival at the facility, view and confirm demographic and insurance information, electronically sign consent documents and make payments.
- All information entered by the patient flows seamlessly to the Healthcare Organization's (HCO) back-end system, helping reduce administrative costs for the organization and minimizing the risk of error.

Features:

- Appointment check-in
- Secure patient identification
- Real time demographics verification

SHOE POLISH KIOSK WITH **ADVERTISEMENT**

Purpose:

Every big market, restaurant, hotel, commercial building, bank, station, subway, airport, all kinds of business hall and so on, all these places have common objects--Ordinary advertising machines. But for the ordinary advertising machines, its weakness is that it only has just on single advertising function.

Therefore, when people passed and looked it, they really don't want to go to see the advertising machine broadcasting advertisements. That' the reason why actual advertising effect is very low.

While our company's advertising shoe polisher, can directly change this situation. As long as laying our automatically advertising shoe polisher in the public places, all the passed person will keep their eyes on our machine's distinctive function of polishing shoes automatically, they will naturally pay attention to the broadcasted advertisement content.

So the advertising audience rate also will be greatly of ascension

Features:

- Control one or all terminals
- Support play files & roll-text in the specified time, support play list.
- Have a lock, anti-theft functions
- Support cut-in broadcasting
- Can set several assistant of administrator with limits of authority
